

UK Food Exports™ - Buyer Alerts

Buyer Alert Referrals

Below is a list of new buyer alert referrals. The referral process we provide allows for both parties, (buyer and potential supplier) to receive each others contact information simultaneously so that an effective introduction is certain. UK supplier referrals will only be made if it is clear that the UK supplier is capable of supplying the client as required. Our buyer support team will respond to each UK request for a referral in order of receipt. They will also request that referred UK suppliers confirm progress made with each buyer.

N.B. Buyer alerts are generated by our buyer support team and NOT sourced via the DIT.
